ACADEMIC PROJECTS

1. **Real-time Deployment on Kubernetes using Jenkins CI/CD:** https://github.com/pratham7289/Real-Time-Deployment-on-Kubernetes.git
   - **Situation:** Needed to automate real-time deployments of applications on a Kubernetes cluster for enhanced efficiency.
   - **Task:** Implement a CI/CD pipeline using Jenkins, Ansible, Docker, Git, and Kubernetes.
   - **Action:**
     - Set up infrastructure with Jenkins, Ansible, and Kubernetes. Created Dockerfile and integrated version control with Jenkins.
     - Developed Jenkins pipeline with Groovy scripts for automation.
     - Utilized Ansible for Docker image building and deployment.
     - Configured Kubernetes cluster for high availability and scalability.
   - **Result:** Successful implementation of a streamlined CI/CD pipeline, enabling automated real-time deployments on Kubernetes, improving efficiency and scalability.

2. **Implemented Three-Tier Architecture on AWS:** https://github.com/pratham7289/AWS-Three-Tier-Architecture.git
   - **Situation:** Implemented fault-tolerant, highly available three-tier architecture on AWS for scalability.
   - **Task:** Set up custom VPC with 2 availability zones, deployed web and app servers, and managed a relational database
   - **Action:**
     - Configured VPC with 2 public and 4 private subnets.
     - Established Internet and NAT Gateways for secure communication.
     - Managed security with security groups.
     - Provisioned RDS instances and created database subnet groups.
     - Deployed application instances.
     - Implemented autoscaling with load balancers.
     - Utilized NGINX for frontend web server and load balancing.
   - **Result:** Achieved fault-tolerant architecture on AWS, enhancing scalability and resource utilization

INTERNSHIP/ TRAINING

SUMMER CAMPUS TRAINING - DEVOPS TRAINING

05/2023 - 07/2023

Bhubaneshwar, Odisha

Completed a 2-month DevOps training program at KIIT (Kalinga Institute of Industrial Technology), enhancing knowledge and skills in areas such as Version Control, Continuous Integration and Deployment (CICD), infrastructure automation, configuration management and monitoring.

SKILLS

AWS | Jenkins | Linux | Cheff | Ansible | Kubernetes | Git/GitHub | Terraform | Trivy | Nginx | CI/CD | SonarQube | GitOps | Docker | Serverless | GitLab | ArgoCD | Maven

FUNDAMENTALS: OOPS | DBMS | SQL | OS | C++ | PYTHON

EDUCATION

B.Tech (CSE)	2020-24	KIIT University, Odisha	8.94 / 10 CGPA	
High School (Class XII)	2020	Nobel Academy, Nepal	3.22 / 4 CGPA	
Secondary School (Class X)	2018	Phalewas Model Secondary School, Nepal	3.60 / 4 CGPA	

ACHIEVEMENTS AND AWARDS

- **Awarded from COMPEX SCHOLARSHIP by Embassy of India.**
- On-going Book Chapter "**Computer Vision in Smart Agriculture"** will be published by Nova Science Publishers.
- Best **Speaker Award** in Nobel Model United Nation (**NMUN**).
